

Job Code: SC0010

Synthetic Organic Chemists

We are currently seeking highly skilled and motivated synthetic chemists ready to function in a fast-paced and collaborative environment. These are hands-on positions with responsibility for the synthesis, purification, analysis and characterization of small molecule compounds. The ideal candidates should have exceptional organic synthesis training and skills coupled with a strong attention for detail. Previous experience in multi-step synthesis is required.

Responsibilities:

- Design, plan and execute multi-step organic synthesis and purification of high quality target molecules.
- Collaborate with colleagues to ensure timeline adherence and project alignment to meet group and company goals.
- Assist in the planning and management of external research efforts for contract research organizations and collaborations.
- Present work to both internal and external parties as appropriate.

Requirements

Qualifications:

- Ph.D. in organic/bioorganic chemistry with minimum 3 years of industry experience, or MS in organic/bioorganic chemistry with minimum 5 years of industry experience.
- Sound knowledge of organic chemistry reactions, mechanisms, and multi-step synthesis.
- Must have demonstrated awareness of safety practices required for working with hazardous chemicals.
- Excellent interpersonal skills and ability to work efficiently and productively in a highly dynamic team environment.

Competencies:

- Attention to detail.
- Operates independently.
- Effective problem-solving skills / results orientation.
- Effective communicator (oral and written).
- Readily adapts to change.
- Strong team player.
